1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6-10 are rejected under 35 U.S.C. 102(b.) as being clearly anticipated by Ishida.

Ishida disclosed PLL structure (104, 109, Figure 1, column 3, lines 5-17) providing local oscillator signals (to 102, 103, 107, 108) and comprising 1st PLL including 1st VCO (the 109-1 PLL circuit/ 109-3 VCO) and a 2nd PLL including a 2nd VCO (the 104-1 PLL circuit / 104-3 VCO); 1st local oscillator output providing the 1st local oscillator signal (from 109), wherein the VCO (109-3) output is forwarded to the local oscillator (109) output; a 2nd local oscillator output providing the 2nd local oscillator signal (from 104); and a selection component 104-4 for forwarding a signal output by the 1st VCO 109-3 or 2nd VCO 104-3 to the 2nd local oscillator (104) output; the VCO's generating signals in different frequency bands and conforming to different standards for quality (column 1, Description of the Related Art) and the control circuitry (CPU) for the Ishida selection element is considered to be part of the PLL structure for the same reason and in the same manner

Applicant considers transmission / reception control to be a PLL structure function and it forwards a desired one of the VCO outputs to the 2nd local oscillator output when a particular VCO band is required; the controller setting the frequency before selection takes place (column 3, lines 53-62); the 1st and 2nd local oscillator outputs going to transmitter chains (103, 108) and receiver chains (102, 107), the 1st local oscillator supplying 107 and 108 and the 2nd local oscillator supplying 102 and 103 respectively.

3. Claims 5 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Mis whose telephone number is (571)272-1765. The examiner can normally be reached on Monday through Thursday.
